

Homework Studio — User Manual

A step-by-step guide to the four roles: Teacher, Parent, Student, and Admin.

Independent portfolio demo. All students and data are synthetic. This manual walks through what each person does, with screenshots of the live app.

Getting started

Open the app and you land on the sign-in screen. Instead of typing a password, you pick a **role** to explore the demo — one tap signs you in as a sample user.

Demo accounts — every account uses the password `demo1234` :

Role	Email	Lands on
👩🏫 Teacher	teacher@demo.id	Class dashboard
👨👩👧 Parent	parent@demo.id	Your children's progress
👦 Student	student@demo.id	Your exams
🏫 Admin	admin@demo.id	School overview

Switch roles anytime with **Switch role** in the top-right corner.

What you can upload — and what the AI makes from it

The teacher uploads **teaching material** (a syllabus or lesson). Nothing else in the app requires an upload.

Accepted formats:

Type	Extensions	Read by
Document	.pdf	The vision model (the first page is rasterized and transcribed)
Image	.png , .jpg , .jpeg	The vision model (transcribed to text)
Text	.txt , .md	Read directly

- **One file per upload**, up to **25 MB**.
- `.docx` is not supported yet — export to PDF or paste into a `.txt` / `.md` first.
- On the free demo (no AI key), plain-text `.txt` / `.md` works best, since reading a PDF or photo needs the vision model.

From one material, the AI produces three things:

1. **A custom exam** — multiple-choice questions grounded in your material, that students take and get auto-graded.
2. **Teaching notes** — a short lesson summary (key points + a worked example).
3. **Tutor knowledge** — the material is indexed so the student tutor answers from *your* class's content.

Teacher

What you do: upload material, let the AI turn it into an exam, review the questions, and publish. Then watch how the class does.

The dashboard

You land on the class at a glance: how many students, how many exams have been taken, the class average, and how many AI questions are **awaiting your review**. Below are the four-step flow, the score distribution, the per-subject averages, and your recent materials.

Step by step: material → a published exam

1. Open Materials → choose a subject and (optionally) a title. 2. Drop your file onto the box, or click to browse. The accepted formats and the 25 MB limit are shown right under the drop zone.

3. Press **"Upload & generate"**. The material now moves through the pipeline. You'll see its status change:

Status	What it means
Processing...	The AI is reading the material, writing notes, and generating the exam. Usually a few seconds (longer for a PDF/photo).
Ready 	Done — teaching notes were written and an exam was generated. A View exam → link appears.
Failed	The file couldn't be read (corrupt file, or an image/PDF with no AI key). Try a <code>.txt</code> / <code>.md</code> , or check the file.

4. **Review the generated exam.** Open the exam (from **View exam** → or the **Exams** tab). Every question shows the AI's **confidence**. The ones the model was *least* sure about are **flagged for review** (amber) — that's the human-in-the-loop gate: nothing reaches students until you approve it.

Fractions for Grade 4 — Exam

Review the AI-generated questions. Flagged ones are the model's least-confident reads — check them, drop any that are wrong, then publish.

[✓ Approve & publish](#)

1 question is flagged as low-confidence — worth a look before publishing.

1. Which is closest to one whole?

review - 57%

3/4 ✓

1/4

1/2

2/8

$\frac{3}{4}$ is nearest to 1.

Discard this question

2. Which fraction is bigger: 1/2 or 1/4?

✓ 94%

1/2 ✓

1/4

They are equal

You cannot tell

Halves are bigger than quarters.

Discard this question

3. What is 1/2 of 8?

✓ 92%

2

3

4 ✓

5

$8 \div 2 = 4.$

Discard this question

4. Half of a pizza is the same as ___ of the pizza.

✓ 86%

1/2 ✓

2/2

1/4

1/3

Half means $\frac{1}{2}$.

Discard this question

For each question you can:

- **Keep it** — the correct answer is highlighted in green; a confidence badge shows how sure the AI was.
- **Discard this question** — drops a question that's wrong or off-topic.

5. Press "Approve & publish". The exam's status becomes **Published** and it appears for students. That's it — the material is now an assessment.

What "success" looks like: the material reads **Ready**, the exam has sensible questions (flagged ones checked), and after publishing its badge is **Published**. **What "needs a look" looks like:** an exam badge of **Needs review**

with a flagged count — one or more questions the AI wasn't confident about, waiting for you.

Exam states:

Exam status	Meaning
Draft	Generated; every question cleared the confidence bar. Publish when ready.
Needs review	One or more questions are flagged — check them before publishing.
Published	Live for students.

 Student

What you do: take the exams your teacher published, see how you did, and learn.

1. Your exams

The **Exams** page lists every exam published for your subjects. Pick one and press **Start exam**.

Math Basics — Quiz

5 questions

Start exam

2. Answer, submit, and learn

Tap an option for each question, then **Submit** to see your score. At any time tap  **Show me how** for a step-by-step explanation (math renders properly). When you're done you get an instant percentage and can review every answer.

Science Basics — Quiz

Answer each question, then submit to see how you did.

← All exams

1. Which gas do plants absorb during photosynthesis?

Hide explanation

Plants take in carbon dioxide.

2. What is the closest planet to the Sun?

💡 Show me how

3. What organ pumps blood around the body?

💡 Show me how

4. How many legs does an insect have?

💡 Show me how

5. What force pulls objects toward Earth?

💡 Show me how

Submit (0/5 answered)

3. Ask the tutor

Open **Tutor** to chat. It's patient, explains step by step, and answers from **your class's material** (the teacher's uploads), not the whole internet.

Parent

What you do: see how your child is doing, and open a printable report.

1. Your child's progress

My children opens on your child's progress: their overall average, how many exams they've taken, a **trend over time**, and **strength by subject**. At the top you may see **This week's report** — written **automatically** by the system, no one pressing a button.

 Admin

What you do: monitor the whole school and watch the automation work.

1. School overview

Overview is the school at a glance: totals, the class average, and **mastery bands** (mastered / on track / needs support). The **Needs attention** panel surfaces students below 65% first. Below are top performers, strength by subject, the score distribution, and the full roster — each with a plain-language note.

School overview

Everyone's progress in one place — with the students who need attention surfaced first.

2. Automation

Automation is where the background work shows up: the scheduler's status ("running · every 6h · **0 hands on it**"), how many reports it wrote and how many students it **auto-flagged**, which **AI models** are in use, and a **live activity feed**. Press ► **Run now** to trigger a run immediately.

Homework Studio Overview Automation Materials Exams Admin Viewing as Admin Switch role

Automation

What Homework Studio does on its own — reading, grading, reporting, and flagging without anyone pressing a button. Run now

Weekly report scheduler — running every 6h

5 reports generated **3** students auto-flagged **1m ago** last run **0** hands on it

AI in use

Material reader: glm
Tutor: glm

Runs on a deterministic mock by default; real models activate with a key.

How the automation works

- 1 Reads & builds**
Uploaded material is read and turned into an exam.
- 2 Reports**
Each student's weekly report is written on a timer.
- 3 Flags**
Students who slip below 65% are flagged for support.
- 4 Delivers**
Parents just see it — no one pressed a button.

Admins can also open the teacher's **Materials** and **Exams** tools from the nav.

Documents the system produces

Besides the exam, two other documents come out of one upload:

- **Teaching notes** — a lesson summary (key points + a worked example) generated from your material, shown on the material.

- **The parent progress report** — a one-page, printable report per child (Save as PDF from the browser), refreshed automatically each week by the background scheduler.

Frequently asked

Do I need an API key to try it? No. Everything runs on a free, built-in demo mode by default. Real AI models (reading PDFs/photos, richer exam generation, the tutor) turn on with a key.

What can I upload, and how big? One file per material: **PDF, PNG, JPG, TXT, or MD**, up to **25 MB**. (`.docx` isn't supported yet.)

Who grades the exams? They're **auto-graded** the moment a student submits. The teacher's review is on the *questions* (before publishing), not on each student's answers.

It works on my phone? Yes — responsive to phone width, and installable (Add to Home Screen) as an app with an offline shell.

See `TECHNICAL.md` for the architecture, data flow, and database design behind these screens.
