

Homework Studio — User Manual

A step-by-step guide to the four roles: Teacher, Parent, Student, and Admin.

Independent portfolio demo. All students and data are synthetic. This manual walks through what each person does, with screenshots of the live app.

Getting started

Open the app and you land on the sign-in screen. Instead of typing a password, you pick a **role** to explore the demo — one tap signs you in as a sample user.

Demo accounts — every account uses the password `demo1234` :

Role	Email	Lands on
 Teacher	<code>teacher@demo.id</code>	Class dashboard
 Parent	<code>parent@demo.id</code>	Your children's progress
 Student	<code>student@demo.id</code>	Your learning home (XP, streak, badges)
 Admin	<code>admin@demo.id</code>	School overview

Switch roles anytime with **Switch role** in the top-right corner.

What you can upload — and what the AI makes from it

The teacher uploads **teaching material** (a syllabus or lesson). Nothing else in the app requires an upload.

Accepted formats:

Type	Extensions	Read by
Document	.pdf	The vision model (the first page is rasterized and transcribed)
Image	.png , .jpg , .jpeg	The vision model (transcribed to text)
Text	.txt , .md	Read directly

- **One file per upload**, up to **25 MB**.
- `.docx` is not supported yet — export to PDF or paste into a `.txt` / `.md` first.
- On the free demo (no AI key), plain-text `.txt` / `.md` works best, since reading a PDF or photo needs the vision model.

From one material, the AI produces three things:

1. **A custom exam** — multiple-choice questions grounded in your material, that students take and get auto-graded.
2. **Teaching notes** — a short lesson summary (key points + a worked example).
3. **Tutor knowledge** — the material is indexed so the student tutor answers from *your* class's content.

Teacher

What you do: upload material, let the AI turn it into an exam, review the questions, and publish. Then watch how the class does.

The dashboard

You land on the class at a glance: how many students, how many exams have been taken, the class average, and how many AI questions are **awaiting your review**. Below are the four-step flow, the score distribution, the per-subject averages, and your recent materials.

3. Press **"Upload & generate"**. The material now moves through the pipeline. You'll see its status change:

Status	What it means
Processing...	The AI is reading the material, writing notes, and generating the exam. Usually a few seconds (longer for a PDF/photo).
Ready	Done — teaching notes were written and an exam was generated. A View exam → link appears.
Failed	The file couldn't be read (corrupt file, or an image/PDF with no AI key). Try a <code>.txt</code> / <code>.md</code> , or check the file.

4. **Review the generated exam.** Open the exam (from **View exam** → or the **Exams** tab). Every question shows the AI's **confidence**. The ones the model was *least* sure about are **flagged for review** (amber) — that's the human-in-the-loop gate: nothing reaches students until you approve it.

Fractions for Grade 4 — Exam

Review the AI-generated questions. Flagged ones are the model's least-confident reads — check them, drop any that are wrong, then publish.

[✓ Approve & publish](#)

1 question is flagged as low-confidence — worth a look before publishing.

1. Which is closest to one whole?

review - 57%

3/4 ✓

1/4

1/2

2/8

$\frac{3}{4}$ is nearest to 1.

Discard this question

2. Which fraction is bigger: 1/2 or 1/4?

✓ 94%

1/2 ✓

1/4

They are equal

You cannot tell

Halves are bigger than quarters.

Discard this question

3. What is 1/2 of 8?

✓ 92%

2

3

4 ✓

5

$8 \div 2 = 4$.

Discard this question

4. Half of a pizza is the same as ___ of the pizza.

✓ 86%

1/2 ✓

2/2

1/4

1/3

Half means $\frac{1}{2}$.

Discard this question

For each question you can:

- **Keep it** — the correct answer is highlighted in green; a confidence badge shows how sure the AI was.
- **Discard this question** — drops a question that's wrong or off-topic.

5. Press "Approve & publish". The exam's status becomes **Published** and it appears for students. That's it — the material is now an assessment.

What "success" looks like: the material reads **Ready**, the exam has sensible questions (flagged ones checked), and after publishing its badge is **Published**. **What "needs a look" looks like:** an exam badge of **Needs review**

with a flagged count — one or more questions the AI wasn't confident about, waiting for you.

Exam states:

Exam status	Meaning
Draft	Generated; every question cleared the confidence bar. Publish when ready.
Needs review	One or more questions are flagged — check them before publishing.
Published	Live for students.

Student

What you do: take exams, practise, learn from your mistakes, and level up.

1. Your learning home

Home is a gamified overview: your **level ring** and **XP**, a **day streak**, and quick chips (average, best score). It shows your **badges** (earned + still-locked with a hint), your **subject mastery**, your **recent results**, and the **class leaderboard**. Earn XP by taking exams and practising.

Science Basics — Quiz

You scored 40% — here's every question with the right answer.

1. Which gas do plants absorb during photosynthesis? X missed

Oxygen — your answer

Carbon dioxide ✓

Nitrogen

Hydrogen

Plants take in carbon dioxide.

2. What is the closest planet to the Sun? ✓ correct

Venus

Mercury ✓

Earth

Mars

Mercury is first from the Sun.

3. What organ pumps blood around the body? X missed

Lungs — your answer

Heart ✓

Brain

Liver

The heart pumps blood.

4. How many legs does an insect have? ✓ correct

4

6 ✓

8

10

Insects have six legs.

5. What force pulls objects toward Earth? X missed

Friction — your answer

Gravity ✓

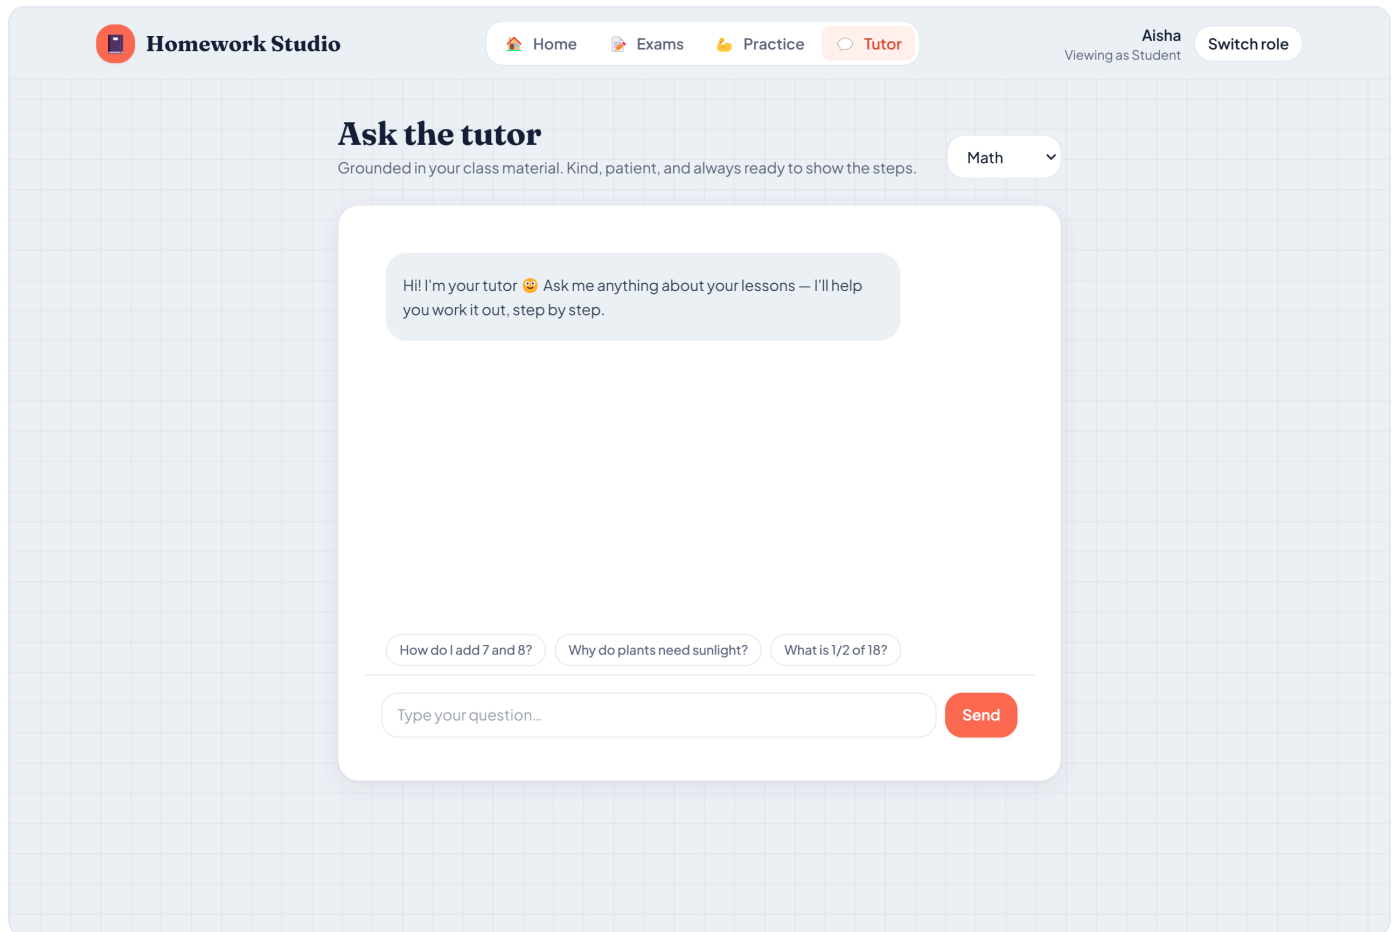

Magnetism

Tension

Gravity pulls objects down.

5. Ask the tutor

Open **Tutor** to chat. It's patient, explains step by step, and answers from **your class's material** (the teacher's uploads), not the whole internet.

Parent

What you do: see how each child is doing — grades *and* effort — get a tip on how to help, and open a printable report.

1. Your children

My children opens on a card per child showing not just grades but **engagement**: the overall average, a **day streak**, their **level**, and **badges earned** — with a "**needs a look**" flag for anyone dipping below 65%. Tap a card to see that child in detail. Below the cards you get:

-  **How to help** — a short, warm suggestion (AI-generated) built from your child's strongest subject and the area to grow.
- **This week's report** — written **automatically** by the system, no one pressing a button.
- **Progress over time** and **Compared to the class** (your child vs the class average per subject, with a marker for the class).
- **What's new** — a feed of reports, badges earned, new exams, and any at-risk alerts.
- The full **exam history**.

Admins can also open the teacher's **Materials** and **Exams** tools from the nav.

Homework Studio — independent portfolio demo

Page 16 / 17

Documents the system produces

Besides the exam, two other documents come out of one upload:

- **Teaching notes** — a lesson summary (key points + a worked example) generated from your material, shown on the material.
 - **The parent progress report** — a one-page, printable report per child (Save as PDF from the browser), refreshed automatically each week by the background scheduler.
-

Frequently asked

Do I need an API key to try it? No. Everything runs on a free, built-in demo mode by default. Real AI models (reading PDFs/photos, richer exam generation, the tutor) turn on with a key.

What can I upload, and how big? One file per material: **PDF, PNG, JPG, TXT, or MD**, up to **25 MB**. (`.docx` isn't supported yet.)

Who grades the exams? They're **auto-graded** the moment a student submits. The teacher's review is on the *questions* (before publishing), not on each student's answers.

It works on my phone? Yes — responsive to phone width, and installable (Add to Home Screen) as an app with an offline shell.

See `TECHNICAL.md` for the architecture, data flow, and database design behind these screens.
