

Homework Studio — User Manual

A guide to the four roles: Teacher, Parent, Student, and Admin.

Independent portfolio demo. All students and data are synthetic. This manual walks through what each person sees and does, with screenshots of the live app.

Getting started

Open the app and you land on the sign-in screen. Instead of typing a password, you pick a **role** to explore the demo — one tap signs you in as a sample user for that role.

Demo accounts — every account uses the password `demo1234` :

Role	Email	Lands on
 Teacher	<code>teacher@demo.id</code>	Class dashboard
 Parent	<code>parent@demo.id</code>	Your children's progress
 Student	<code>student@demo.id</code>	Practice
 Admin	<code>admin@demo.id</code>	School overview

You can switch roles at any time with **Switch role** in the top-right corner.

Teacher

What you can do: upload a child's homework and let it grade itself, review anything the reader wasn't sure about, and see how the whole class is doing.

1. The class dashboard

After signing in you see the class at a glance: how many students, how many homeworks are graded, the class average, and how many answers are **awaiting your review**. If anything needs you, a banner at the top takes you straight to it. Below are the score distribution, the average per subject, and your most recent homework.

2. Upload a homework

Go to **Upload**. Choose which student the homework belongs to, then drop a **PDF or photo** onto the box (or click to browse). Tip: if the file name contains "math" or "science", the subject is detected automatically.

Homework Studio — independent portfolio demo

Page 3 / 13

Press **Upload & grade**. In a couple of seconds the homework is read question-by-question, graded, and — if every answer was read clearly — marked done. Each answer is shown as correct, wrong, or flagged for review.

3. Work the review queue

Sometimes the reader isn't fully sure it read an answer correctly (messy handwriting, a smudge). Rather than guess a child's grade, it opens a **review task**. The **Review** page shows only those answers — never the whole pile.

Each card names the exact question, shows what the reader *thinks* the student wrote (and how sure it was), and the answer key. Confirm what the student actually wrote and press **✓ Correct** or **✗ Wrong**. The homework **re-grades itself** the moment you resolve it.

Homework Studio

Review queue

These are the only answers the reader wasn't sure about. Confirm what the student wrote and the homework re-grades itself.

Aisha Putri · Math Worksheet — Addition

read 55% sure

Q3. $7 + 9 = ?$

read as "17 (unclear)" · answer key: 16

What did the student actually write?

✓ Correct

X Wrong

Why this matters: a homework auto-grades *only* when every answer cleared a confidence threshold. Anything below it waits for you. The model never silently decides a child's grade off a shaky read — you stay in control.

Parent

What you can do: see how your child is doing in plain language, and open a printable progress report.

1. Your child's progress

The **My children** page opens on your child's progress: their overall average, how many homeworks they've done, a **trend over time**, and their **strength by subject**. If more than one child is linked to you, switch between them with the dropdown.

At the top you may see **This week's report** — a short summary that was **generated automatically** by the system, with no one pressing a button.

Student

What you can do: practise with a fresh set of questions, get instant feedback, see step-by-step explanations, and ask a friendly tutor for help.

1. Start a practice set

On **Practice**, pick a subject and press **Start practice**. You get **five questions** made for you.

2. Answer, check, and learn

Tap an option for each question. When you're ready, press **Submit** to see how you did. At any time you can tap  **Show me how** under a question for a step-by-step explanation (math is shown properly, not as code). Want a different set? Press **New set**.

Practice

A fresh set every time. Answer, then see how you did — and tap “Show me how” anytime.

0 of 5 answered

New set

1. Maya has 245 stickers and her friend gives her 128 more. How many stickers does Maya have now?

 Show me how

2. Each spider has 8 legs. How many legs do 6 spiders have altogether?

 Show me how

3. Which fraction is greater: $\frac{3}{4}$ or $\frac{2}{3}$?

 Show me how

4. A rectangular garden is 9 meters long and 5 meters wide. What is the distance all the way around it?

 Show me how

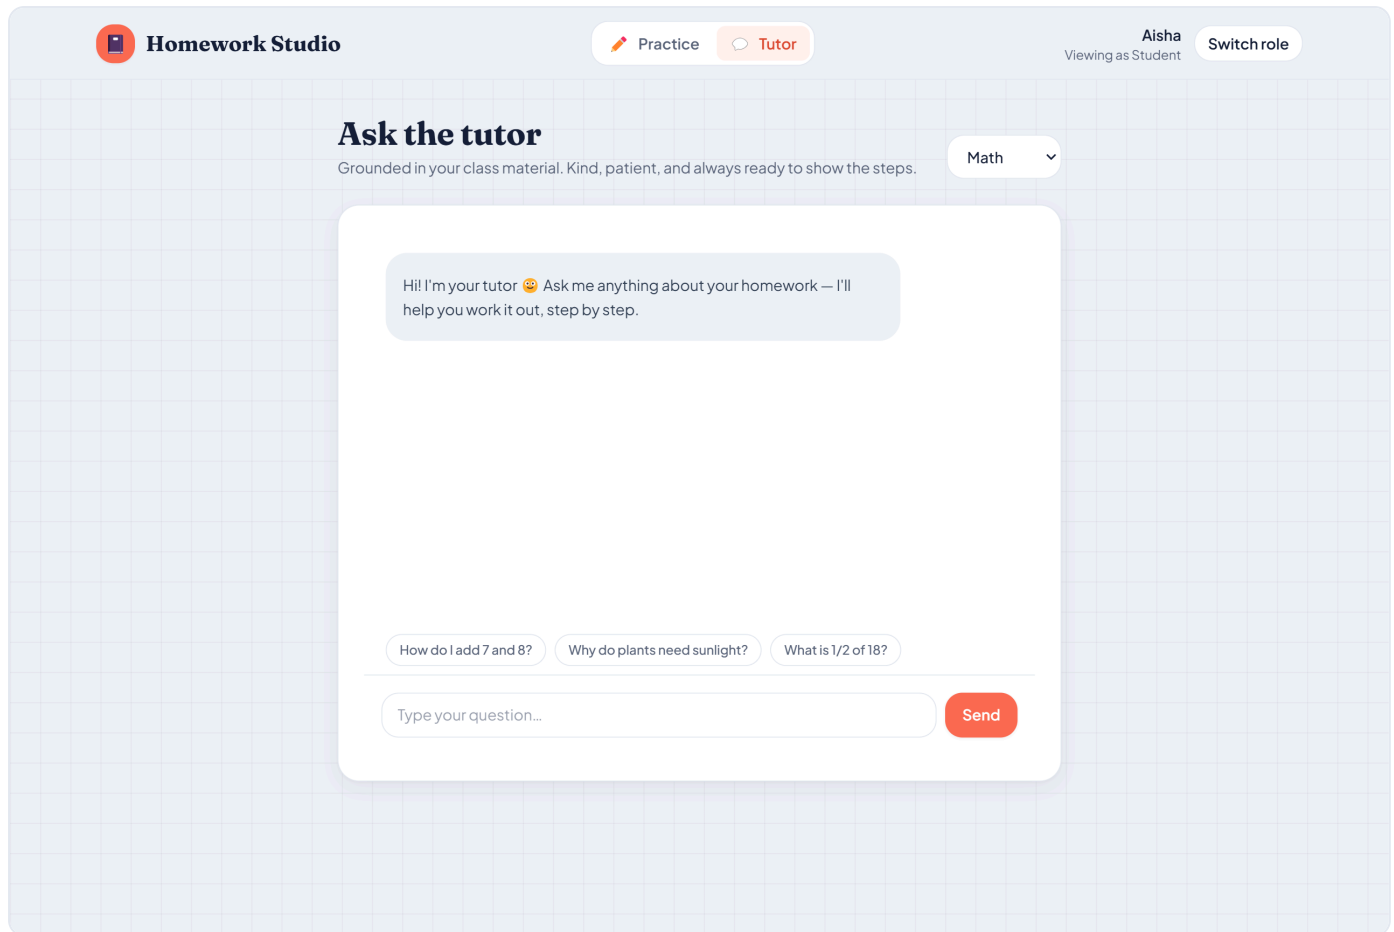

5. Ms. Lopez has 50 pencils to share equally among 6 students. After everyone gets a fair share, how many pencils are left over?

 Show me how

Submit (0/5 answered)

3. Ask the tutor

Open **Tutor** to chat. The tutor is kind and patient, explains things step by step, and draws on your class material. Not sure where to start? Tap one of the suggested questions.

Admin

What you can do: monitor the whole school's progress and watch the automation work.

1. School overview

The **Overview** page is the school at a glance: totals, the class average, and **mastery bands** (mastered / on track / needs support) so you see the shape of the whole school, not just an average. The **Needs attention** panel surfaces students below 65% first — worth a check-in before they fall behind. Below are top performers, strength by subject, the score distribution, and the full roster, each with a plain-language note explaining what it shows.

2. Automation

The **Automation** page is where the background work shows up. You can see the scheduler's status ("running · every 6h · **0 hands on it**"), how many reports it has written and how many students it **auto-flagged** for support, and which **AI models** are in use. The **Recent activity** feed logs what the automation did — reports written (📅) and at-risk students flagged (⚠️) — and refreshes on its own. Press ▶ **Run now** to trigger a run immediately.

AI in use

Homework reader: glm

Tutor: glm

Runs on a deterministic mock by default; real models activate with a key.

How the automation works

1

Reads & grades

Homework is read and graded by the AI as it arrives.

2

Reports

Each student's weekly report is written on a timer.

3

Flags

Students who slip below 65% are flagged for support.

4

Delivers

Parents just see it — no one pressed a button.

Frequently asked

Do I need an API key to try it? No. Everything runs on a free, built-in demo mode by default. Real AI models (for reading photos and the tutor) turn on with a key.

Is the data real? No — every student, homework, and score here is synthetic.

It works on my phone? Yes. The app is responsive down to phone width and can be **installed** (Add to Home Screen) as an app, with an offline app shell.

How do I switch roles? Use **Switch role** in the top-right, then pick another role on the sign-in screen.

See [TECHNICAL.md](#) for the architecture, data flow, and database design behind these screens.
